The orbiter of Chandrayaan-2 which originally has a mission life of 1 year has been given an extension and will now be operational for 7 years.

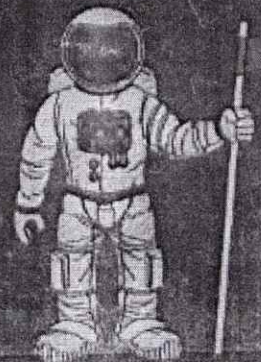

CHANDRAYAAN-3

Chandrayaan-3's payload will be similar to Chandrayaan-2. It will also have a lander-rover like its previous iteration. Changes will be made to the sequence of powered descent, during which as velocity loss had caused the Chandrayaan-2's lander-rover to crash.

GSLV Mark-III had to be operationalized for launching Chandrayaan-2 that's already in place will be used by the lander-rover to communicate with Earth.

India will launch its third mission, Chandrayaan-3, to the moon in an attempt to land on its surface in 2020-21. The mission will target a soft landing near the Lunar South Pole.

METAVVERSE

Metaversa is a term used to describe a universe that exists parallel to the physical world

A place where users interact with each other and digital objects in real time

User can move seamlessly between different environments

A place where users interact with each other and digital objects real time

It's a concept that has been popularized in science fiction, movies and video games
