REPORT OF GUEST LECTURE CONDUCTED FOR CIVIL ENG. STUDENTS

Topic: Sustainable Construction

Speaker-: Ashok Kumar Garg
Date: 17/01/2023
Venue- B Block Seminar Hall

The goals of sustainable construction are to reduce the industry's impact on the environment. Sustainable construction methods include:

- using renewable and recyclable materials
- reducing the embodied energy in building materials
- reducing the energy consumption of the finished building
- reducing on-site waste
- Protecting the natural habitats during and after the construction phase.

Need for sustainable Construction

From energy usage to emissions, the construction industry has a huge impact on the environment.

Aside from the loss of wild habitats from the development of green field sites, energy is used on site during the construction phase. Heavy plants used in construction still lean heavily on fossil fuels. The construction industry is also responsible for the embodied energy within the building materials as well as the legacy of the buildings energy needs when in use.

Clearly, informed choices at every stage of a new build project have an environmental impact. In fact, the construction industry accounts for an incredible 36% of worldwide energy usage, and 40% of CO_2 emissions.

The fabrication and shipping of materials can have a great impact on carbon emissions. Mining for raw materials can result in the pollution of water courses. The manufacture of cement currently resulted in global annual emissions of 2.8bn tonnes of CO_2, should current rates of urbanisation continue this could rise to over 4bn tonnes every year.

REPORT OF GUEST LECTURE CONDUCTED FOR CIVIL STUDENTS

Topic: INDUSTRY REQUIRMENTS
Speaker-: HIMANSHU ASHWAL
Date: 11/04/2023
Venue-C Block Lab

Becoming a civil engineer is a rewarding career because you can create modern structures like highways. Schools, bridges, hospitals, office buildings and residential apartments. Civilian engineers need a special set of skills to plan and design innovative structures and buildings. Developing these skills can help you understand if this career aligns with your interests and qualifications. In this session, we will discuss about skills a civil engineer requires, understand their duties and explore some basic engineering skills to master.

Objective
- Allocating the Resources Right
- Solving Problems Effectively
- Identifying and Grabbing Opportunities
- Goal achievement
- Conflict Resolution at Work

Future Outcomes
- Career growth
- Industrial Achivements
- Participation in Industrial growth as well.

Report of Guest Lecture on MACHINE LEARNING For B.Tech Student

Topic: - MACHINE LEARNING

Speaker: - Prakhar Goel

Date: - 09/12/2022

Time: - 10:00 AM - 01:00 PM & 02:00 PM – 05:00 PM

Venue: - B Block Lab

This program is organized by Department of CSE to benefit and enhance the skill of B.Tech 2nd Year and 3rd Year students. Approximately 2.21. students have benefits by this program.

"Machine learning is a field of artificial intelligence that enables systems to learn and improve from experience without being explicitly programmed."

OBJECTIVE:-

Provide students with a basic understanding of what machine learning is and how it differs from traditional programming. Illustrate the practical applications of machine learning across various industries, such as healthcare, finance, marketing, and technology.

FUTURE OUTCOMES:-

- Personalized learning experiences
- Skills for the evolving job market
- Innovative teaching tools
- Automation of administrative tasks
- Development of critical thinking skills

- Entrepreneurship education teaches students to have a growth mindset, no matter their differences in world view, by encouraging the idea that skills and intelligence are improved through time and effort, rather than being

- One major benefit of studying **entrepreneurship** and innovation is the gained ability to recognize opportunity.

OBJECTIVES:-

Entrepreneurship education helps students develop a range of skills and competencies that are valuable in both their personal and professional lives.

FUTURE OUTCOMES:-

- Entrepreneurship in college cultivates a diverse skill set, including critical thinking, problem-solving, leadership, and adaptability.
- Students increase their awareness and deliberately practice the skills and disciplines necessary to increase confidence and agency.
- Entrepreneurship-focused programs teach students crucial life skills that will help them navigate this uncertain future.

Session 2022-2023
REPORT OF GUEST LECTURECONDUCTED FOR MCA STUDENTS

Topic: Data Base Management System
Speaker-: Mr. Amit Srivastava
Date: 26/12/2022

Database management creates a place where users have an advantage of more and better-managed data. Thus making it possible for end-users to have a quick look and to respond fast to any changes made in their environment.

Due to the Database Management System we have access to well-managed and synchronized forms of data thus it makes data handling very easy and gives an integrated view of how a particular organization is working and also helps to keep track of how one segment of the company affects another segment.

The Database management system (DBMS) helps to produce quick answers to database queries thus making data access faster and more accurate. For example, to read or update the data. For example, end-users, when dealing with large amounts of sale data, will have enhanced access to the data, enabling a faster sales cycle.

Objective

- To Reduce Duplication
- To Share the Data
- To Bring Integrity of Data
- To Secure the Data
- Bring Independence in Data

Future Outcomes

The future of database technology is poised to experience huge breakthroughs, revolutionizing how we handle, store, and analyze data as the world becomes more and more data-driven. Because of this, the future of database developer or administrator jobs will become more critical as they are vital to data-driven decision-making within organizations.

Hello sir

We are currently organizing an event focused on enhancing the understanding of Database Management Systems (DBMS) among our students, and we would be honored to have you as a guest speaker.

We believe that your expertise and experience in the field of DBMS would greatly benefit our students and add valuable insights to our curriculum. Your insights on [specific topic or aspect of DBMS] would be particularly relevant to our students, as it aligns well with the current focus of our database management courses.

Inviewofthis,OurInstitutionwouldliketorequestyoutoconductaGuest Lecture withthegiventheme:"Data Base Management System"tobefacilitatedtothewholeMCAstudents.
