Report of Seminar Conducted For B. Tech Student

Topic: - "Networking & 4G LTE."

Speaker: Mr. Utkarsh Upadhyay

Date: - 19/12/2020

Time: - 10:00 AM- 12:30 PM & 02:00 PM-04:30 PM

Venue at : Online Mode

This program is organized by Department of ECE to benefit and enhance the skill of B. Tech 2nd Year and 3rd Year students. Approximately 173 students have benefits by this program.

- It's a worldwide standard for 4G wireless transmission data, the fourth generation of mobile network technology initiated in 2008.
- 4G LTE networks are the next generation from the existing 3G networks - Universal Mobile Telecommunications System UMTS or 3rd generation.

OBJECTIVES:-

- The main goal of LTE is to provide a high data rate, low latency and packet optimized radio access technology supporting flexible bandwidth deployments.
- The main goal of computer networking is to link devices and enable smooth communication and data exchange between them. Resource sharing: By allowing linked devices to share hardware, software, and data resources, networking maximizes resource usage and fosters cooperation.

FUTURE OUTCOMES:-

- No major carriers have announced plans to shut down their 4G networks, so it's safe to assume that 4G will be around for quite a while. If we look at 3G as an example of what we might expect, it is supposed to provide its customers with better speed and all IP based multimedia services.
- 4G is all about an integrated, global network that will be able to provide a comprehensive IP solution where voice, data and streamed multimedia can be given to users on an "Anytime, Anywhere" basis.
