TIME: 02:00 pm-05:00pm

VENUE: A Block seminar hall

This workshop is conducted by Department of ME to improve technical and computing skills of ME students. Approximately 60 students have benefits by this workshop.

- Data analysis is rooted in statistics, which has a pretty long history. It is said that the beginning of statistics was marked in ancient Egypt as it took a periodic census for building pyramids.
- Data analysis is a process that begins with retrieving data from various sources and then analyzing it with the goal of discovering beneficial information.

OBJECTIVES:-

Identifying trends and patterns, Making data-driven decisions, Finding correlations and relationships, Detecting anomalies, Improving performance, and Predictive modeling.

FUTURE OUTCCOMES:-

- The ability to think analytically and approach problems in the right way is a skill that's always useful, not just in the professional world, but in everyday life as well.
- This is the obvious benefit to learning data analytics, and the one most often focused on by students in higher education.

REPORT OF CONDUCTED TRAINING FOR MCA STUDENTS

Topic- Data Analysis Tool Training

Speaker- Mr. Amit Srivastava

Date- 17/11/2018

Time- 10:00 AM

Venue- A block Lab

Approximate 62 Students have joined this Training.

Data analysis tools help companies draw insights from customer data, and uncover trends and patterns to make better business decisions. There are a wide number of online data analysis tools you can make use of, whether you want to perform basic or more advanced data analysis. Data analysis tools help researchers make sense of the data collected. It enables them to report results and make interpretations. How the data is analyzed depends on the goals of the project and the type of data collected.

Objectives

- Assessment and improvement of the quality of the data.
- Compare the target population with the population being studied (sampling population).
- Forecast the possible areas where faults can occur (such as degree of non-response, amount of denials, the comparison groups or the reduction or decrease in number).
- Assessment of the measures of frequency (such as mean, median, mode, etc.) and their amount.
- Assessing, i.e. how much strong relationship exists among the variables.
- Making inferences and taking decisions.

Future Outcomes

As the field of Data Science continues to evolve, it's worth examining where big data analytics is heading in the future. From the rise of edge computing to the adoption of advanced artificial intelligence algorithms, there are many exciting developments on the horizon that will shape the future of big data analytics. Here are a few. And Automation and Data Ops (Data Operations) are emerging technologies that improve data analytics by streamlining and automating various tasks involved in the data pipeline. By automating processes such as data quality checks and version control, Data Ops can improve the accuracy and efficiency of data analytics while also reducing errors.

- Verilog is a HARDWARE DESCRIPTION LANGUAGE (HDL). It is a language used for describing a digital system like a network switch or a microprocessor or a memory or a flip-flop.
- It means, by using a HDL we can describe any digital hardware at any level. Designs, which are described in HDL are independent of technology, very easy for designing and debugging, and are normally more useful than schematics, particularly for large circuits.

OBJECTIVES:-

- Verilog, standardized as IEEE 1364, is a hardware description language (HDL) used to model electronic systems. It is most commonly used in the design and verification of digital circuits at the register-transfer level of abstraction.

FUTURE OUTCOMES:-

- Verilog is expected to continue being used extensively in the VLSI industry due to its maturity, stability, and large existing codebase.
- Many existing designs and intellectual property (IP) cores are written in Verilog, making it necessary to maintain and support Verilog-based designs.
- System Verilog is an extension of Verilog, and most SystemVerilog constructs are compatible with Verilog. Therefore, Verilog knowledge is still valuable when working with System Verilog designs.
