odd sem  
(B1)

**R.D. ENGINEERING COLLEGE, GHAZIABAD**  
**ASSESSMENT ON ADVANCED PYTHON**  
**SESSION 2022-23**

Question 1: In Python, what is a generator used for?

- a) Generating random numbers
- b) Creating objects
- c) Yielding values one at a time, allowing iteration over a potentially large sequence of values
- d) Encrypting data

Question 2: Which library in Python is commonly used for web scraping and parsing HTML and XML documents?

- a) NumPy
- b) BeautifulSoup
- c) Requests
- d) Pandas

Question 3: What does the async and await keywords enable in Python?

- a) Asynchronous programming to manage concurrent tasks
- b) Multithreading for CPU-bound tasks
- c) Defining class constructors
- d) Creating decorators for functions

Question 4: Which of the following is a valid way to create a Python virtual environment?

- a) virtualenv myenv
- b) python -m venv myenv
- c) conda create --name myenv
- d) pip install virtualenv myenv

Question 5: What does the pickle module in Python allow you to do?

- a) Pick random elements from a list
- b) Serialize and deserialize Python objects
- c) Sort a dictionary
- d) Encrypt and decrypt files

Question 6: What does the super() function do in Python?

- a) It returns the next item in an iterable.
- b) It allows you to call a method from the parent class.
- c) It generates random numbers.
- d) It calculates the square root of a number.

Director  
R.D. Engineering College  
Duhai, Ghaziabad

Question 7: In Python, what is the purpose of the logging module?

- a) To perform mathematical calculations
- b) To create graphical user interfaces
- c) To log messages and information for debugging and analysis
- d) To generate random data

Question 8: What is the primary use of the map() function in Python?

- a) Sorting elements in a list
- b) Applying a function to each element in an iterable
- c) Creating a dictionary
- d) Multiplying elements in a list

Question 9: Which of the following is a valid way to handle exceptions in Python?

- a) try-catch
- b) try-finally
- c) try-except
- d) try-rescue

Question 10: What is the purpose of the with statement in Python?

- a) To define a new class
- b) To create a context manager for resource management
- c) To declare constants
- d) To access remote web services

  
Director

**R.D. ENGINEERING COLLEGE, GHAZIABAD**  
**ASSESSMENT ON ADVANCED PYTHON**  
**SESSION 2022-23 ODD SEM (BATCH 2)**

Question 1: What is the purpose of the pickle module in Python?

- a) To store Python objects in a relational database
- b) To serialize and deserialize Python objects
- c) To create GUI applications
- d) To format and display data in tabular form

Question 2: Which of the following libraries is commonly used for web scraping in Python?

- a) Matplotlib
- b) BeautifulSoup
- c) NumPy
- d) Requests

Question 3: In Python, what is the purpose of the asyncio module?

- a) To work with asynchronous I/O operations and event loops
- b) To create graphical user interfaces (GUIs)
- c) To perform mathematical operations on large arrays
- d) To serialize and deserialize data

Question 4: What is the purpose of the with statement in Python?

- a) To define a context manager
- b) To create a list comprehension
- c) To declare a function
- d) To perform file input/output operations

Question 5: Which of the following is NOT a valid way to create a Python virtual environment?

- a) Using the virtualenv command-line tool
- b) Using the venv module (available in Python 3.3 and later)
- c) Using the conda package manager
- d) Using the pipenv package

Question 6: What is the purpose of the map() function in Python?

- a) To apply a function to each item in an iterable and return an iterator
- b) To create a list of items from an iterable
- c) To filter items in an iterable based on a condition
- d) To combine two iterables into a single iterable

  
Director  
R.D. Engineering College  
Duhai, Ghaziabad

Question 7: In Python, which module is commonly used for unit testing?

- a) unittest
- b) test
- c) pytest
- d) testunit

Question 8: What does the `__init__.py` file do in a Python package directory?

- a) It contains documentation for the package.
- b) It is a required file for every Python package.
- c) It initializes all variables and functions in the package.
- d) It serves as an indicator that the directory should be treated as a package.

Question 9: What is a decorator in Python?

- a) A special type of function that is used to create class instances
- b) A way to add behavior to functions or methods without modifying their code
- c) A keyword used to create context managers
- d) A built-in data type for storing key-value pairs

Question 10: Which library is commonly used for data visualization in Python?

- a) BeautifulSoup
- b) Requests
- c) NumPy
- d) Matplotlib

(B1)

Section 1: Object-Oriented Programming

1. Which concept allows a class to inherit properties and methods from another class?
  - a) Polymorphism
  - b) Encapsulation
  - c) Inheritance
  - d) Abstraction
2. What is the process of creating an instance of a class called?
  - a) Encapsulation
  - b) Instantiation
  - c) Inheritance
  - d) Polymorphism
3. What is the purpose of the "self" parameter in a class method?
  - a) It refers to the class itself.
  - b) It is used to access instance variables and methods.
  - c) It is a placeholder for the return value of the method.
  - d) It is used to define class-level variables.
4. Which keyword is used to define a method as a class method in Python?
  - a) self
  - b) cls
  - c) method
  - d) classmethod
5. Which of the following statements is true about the "init" method in Python?
  - a) It is called when an object is created from a class.
  - b) It is used to initialize instance variables.
  - c) It is a constructor method.
  - d) All of the above.

Section 2: Advanced Concepts

6. What is the purpose of a decorator in Python?
  - a) To add functionality to an existing function or method.
  - b) To remove unnecessary code from a program.
  - c) To improve the performance of a program.
  - d) To debug and fix errors in a program.
7. Which module in Python provides support for creating and working with regular expressions?
  - a) re
  - b) regex
  - c) regexpr
  - d) pattern

  
Director  
R.D. Engineering College  
Duhai, Ghaziabad

8. What is the output of the following code snippet? `numbers = [1, 2, 3, 4, 5]`  
`squares = [x**2 for x in numbers]` `print(squares)`
- a) [1, 4, 9, 16, 25]
  - b) [2, 4, 6, 8, 10]
  - c) [1, 2, 3, 4, 5]
  - d) [0, 1, 4, 9, 16]
9. Which module in Python provides support for working with dates and times?
- a) time
  - b) datetime
  - c) calendar
  - d) timedelta
10. What is the purpose of a lambda function in Python?
- a) To create anonymous functions.
  - b) To perform mathematical calculations.
  - c) To define class methods.
  - d) To handle exceptions.

### Section 3: File Handling and Modules

11. Which method is used to check if a file exists in Python?
- a) exists()
  - b) isfile()
  - c) exists\_file()
  - d) is\_file()
12. What is the output of the following code snippet? `import os` `print(os.getcwd())`
- a) The current working directory
  - b) The parent directory
  - c) The root directory
  - d) None
13. Which module in Python is used for data serialization and deserialization?
- a) json
  - b) pickle
  - c) csv
  - d) io
14. What is the purpose of the "**name**" variable in Python?
- a) It stores the name of the current module.
  - b) It stores the name of the current class.
  - c) It stores the name of the current function.
  - d) It stores the name of the current object.
15. Which module in Python provides support for multi-threading?
- a) thread
  - b) threading
  - c) multi\_threading
  - d) parallel

**R.D. ENGINEERING COLLEGE, GHAZIABAD**  
**ASSESSMENT ON ADVANCED PYTHON**  
**SESSION 22-23 EVEN SEM(Batch 2)**

Question 1: What is a decorator in Python?

- a) A design pattern used to create classes.
- b) A way to add behavior to functions or methods.
- c) A data structure for storing key-value pairs.
- d) A module for handling exceptions.

Question 2: In Python, what is the purpose of the yield keyword?

- a) It defines a new class.
- b) It is used for exception handling.
- c) It creates a generator function.
- d) It imports modules.

Question 3: Which of the following is true about multiple inheritance in Python?

- a) Python does not support multiple inheritance.
- b) In multiple inheritance, a class can inherit from multiple base classes.
- c) Multiple inheritance is only allowed for built-in classes.
- d) Multiple inheritance is achieved using the implements keyword.

Question 4: What is the purpose of the \_\_init\_\_ method in Python classes?

- a) It is called to create a new instance of a class.
- b) It is used for method overloading.
- c) It is used to define a class constructor.
- d) It is a reserved keyword and cannot be used in classes.

Question 5: What is the Global Interpreter Lock (GIL) in Python?

- a) It is a module for handling file I/O.
- b) It is a data structure for storing global variables.
- c) It is a lock that allows only one thread to execute Python code at a time.
- d) It is a built-in function for mathematical calculations.

Question 6: Which library in Python is commonly used for data manipulation and analysis?

- a) tkinter
- b) NumPy
- c) math
- d) sys

  
Director  
R.D. Engineering College  
Duhai, Ghaziabad

Question 7: What is the purpose of the with statement in Python?

- a) It is used to create a new class.
- b) It is used for defining functions.
- c) It is used for context management, such as file handling.
- d) It is used for method chaining.

Question 8: What is the difference between a shallow copy and a deep copy of a list in Python?

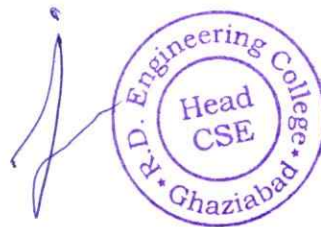

- a) There is no difference; the terms are used interchangeably.
- b) A shallow copy duplicates only the outer list, while a deep copy duplicates all nested lists recursively.
- c) A deep copy is read-only, while a shallow copy is writable.
- d) A shallow copy creates a completely independent copy of the original list.

Question 9: What does the pickle module in Python allow you to do?

- a) It is used for sorting lists.
- b) It provides tools for working with regular expressions.
- c) It allows for the serialization and deserialization of Python objects.
- d) It is used for connecting to databases.

Question 10: Which Python module is used for unit testing?

- a) unittest
- b) pytest
- c) test
- d) assert

**R.D. ENGINEERING COLLEGE, GHAZIABAD**  
**ASSESSMENT ON ADVANCED JAVA**  
**SESSION 2022-23 ODD SEM** (B1)

Question 1: In Java, what is the purpose of the synchronized keyword?

- a) To make a variable immutable
- b) To declare a method as static
- c) To synchronize access to a block of code or an object
- d) To define a constant variable

Question 2: What is the primary use of the Java Persistence API (JPA)?

- a) Creating graphical user interfaces (GUIs)
- b) Managing database persistence and mapping Java objects to database tables
- c) Implementing multithreading in Java applications
- d) Networking and socket programming

Question 3: Which design pattern is used to ensure that a class has only one instance and provides a global point of access to it?

- a) Factory Pattern
- b) Singleton Pattern
- c) Observer Pattern
- d) Strategy Pattern

Question 4: In Java, what is the purpose of the throws keyword in a method declaration?

- a) To define a new exception class
- b) To specify the return type of the method
- c) To declare that the method may throw one or more exceptions
- d) To create a custom annotation

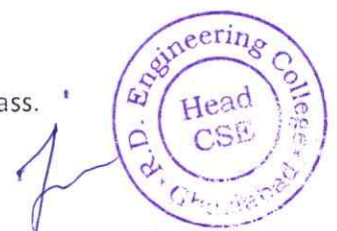

Question 5: Which Java library is commonly used for sending and receiving email messages?

- a) javax.mail
- b) java.net
- c) javax.net
- d) java.mail

Question 6: What is the purpose of the @Override annotation in Java?

- a) It indicates that a method is deprecated and should not be used.
- b) It overrides a superclass method to provide a specific implementation in a subclass.
- c) It defines a new method in an interface.

  
Director  
R.D. Engineering College  
Ghaziabad

d) It specifies that a method is private and cannot be accessed outside the class.

Question 7: Which Java collection class allows you to store key-value pairs and is typically used for caching?

- a) ArrayList
- b) HashSet
- c) TreeMap
- d) LinkedHashMap

Question 8: What is the purpose of the ClassLoader in Java?

- a) To load classes and resources dynamically at runtime
- b) To define access modifiers for class members
- c) To create instances of classes
- d) To manage multithreading in a Java application

Question 9: Which Java framework is commonly used for building web applications and follows the Model-View-Controller (MVC) architectural pattern?

- a) Spring Framework
- b) Hibernate
- c) JavaFX
- d) Swing

Question 10: What is the primary use of the Java Naming and Directory Interface (JNDI)?

- a) Managing database connections
- b) Accessing and managing directory services like LDAP
- c) Creating graphical user interfaces (GUIs)
- d) Generating HTML forms

**R.D. ENGINEERING COLLEGE, GHAZIABAD**  
**ASSESSMENT ON ADVANCED JAVA**  
**SESSION 2022-23 ODD SEM (BATCH 2)**

Question 1: What is the purpose of the java.util.stream package in Java?

- a) To work with input/output streams
- b) To create graphical user interfaces
- c) To perform operations on sequences of elements, such as filtering, mapping, and reducing
- d) To manage database connections

Question 2: Which Java design pattern is used to ensure that a class has only one instance and provides a global point of access to that instance?

- a) Singleton Pattern
- b) Factory Pattern
- c) Observer Pattern
- d) Abstract Factory Pattern

Question 3: In Java, what does JDBC stand for?

- a) Java Database Connector
- b) Java Data Binding and Conversion
- c) Java Database Connectivity
- d) Java Data Backup and Control

Question 4: What is the purpose of the synchronized keyword in Java?

- a) To define a synchronized method
- b) To prevent multiple threads from accessing a block of code simultaneously
- c) To define a static method
- d) To create a new thread

Question 5: Which Java API is commonly used for sending and receiving email messages?

- a) JavaMail API
- b) JavaFX API
- c) Java Networking API
- d) Java Security API

Question 6: What is the purpose of the try-with-resources statement in Java?

- a) To define custom exceptions
- b) To handle exceptions in a try-catch block

  
Director  
R.D. Engineering College  
Nuhai, Ghaziabad

- c) To automatically close resources, such as files and sockets, when they are no longer needed
- d) To create custom data structures

Question 7: Which Java framework is commonly used for building web applications and follows the Model-View-Controller (MVC) architecture?

- a) JavaFX
- b) Java Servlets
- c) Spring Framework
- d) Java Swing

Question 8: What is the purpose of the transient keyword in Java?

- a) To make a variable constant
- b) To indicate that a variable should not be serialized
- c) To declare an abstract class
- d) To create a new thread

Question 9: Which of the following Java technologies is used for creating and deploying web services?

- a) Java RMI (Remote Method Invocation)
- b) JavaFX
- c) JAX-RS (Java API for RESTful Web Services)
- d) Java AWT (Abstract Window Toolkit)

Question 10: What is the purpose of the @Override annotation in Java?

- a) To override a superclass constructor
- b) To indicate that a method is abstract
- c) To indicate that a method is implementing an interface method
- d) To indicate that a method is intended to override a superclass method

Question 1: What is the purpose of the java.util.stream package in Java?

- a) To work with input/output streams
- b) To create graphical user interfaces
- c) To perform operations on sequences of elements, such as filtering, mapping, and reducing
- d) To manage database connections

Question 2: What is the purpose of the transient keyword in Java?

- a) To make a variable constant
- b) To indicate that a variable should not be serialized
- c) To declare an abstract class
- d) To create a new thread

Question 3: What is the primary use of the Java Persistence API (JPA)?

- a) Creating graphical user interfaces (GUIs)
- b) Managing database persistence and mapping Java objects to database tables
- c) Implementing multithreading in Java applications
- d) Networking and socket programming

Question 4: In Java, what is the purpose of the throws keyword in a method declaration?

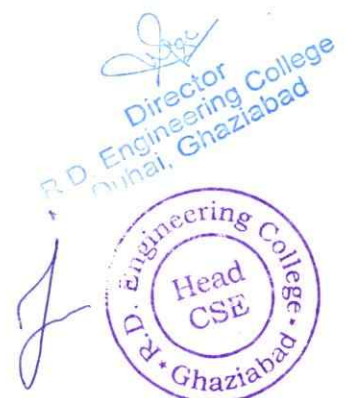

- a) To define a new exception class
- b) To specify the return type of the method
- c) To declare that the method may throw one or more exceptions
- d) To create a custom annotation

Question 5: What is the purpose of the @Override annotation in Java?

- a) To override a superclass constructor
- b) To indicate that a method is abstract
- c) To indicate that a method is implementing an interface method
- d) To indicate that a method is intended to override a superclass method

Question 6: What is the purpose of the ClassLoader in Java?

- a) To load classes and resources dynamically at runtime
- b) To define access modifiers for class members
- c) To create instances of classes
- d) To manage multithreading in a Java application

Question 7: Which Java framework is commonly used for building web applications and follows the Model-View-Controller (MVC) architectural pattern?

- a) Spring Framework
- b) Hibernate
- c) JavaFX
- d) Swing

Question 8: What is the purpose of the try-with-resources statement in Java?

- a) To define custom exceptions
- b) To handle exceptions in a try-catch block
- c) To automatically close resources, such as files and sockets, when they are no longer needed
- d) To create custom data structures

Question 9: Which Java framework is commonly used for building web applications and follows the Model-View-Controller (MVC) architecture?

- a) JavaFX
- b) Java Servlets
- c) Spring Framework
- d) Java Swing

Question 10: Which Java library is commonly used for sending and receiving email messages?

- a) javax.mail
- b) java.net
- c) javax.net
- d) java.mail

- b) To indicate that a method is abstract
- c) To indicate that a method is implementing an interface method
- d) To indicate that a method is intended to override a superclass method

Question 6: What is the purpose of the ClassLoader in Java?

- a) To load classes and resources dynamically at runtime
- b) To define access modifiers for class members
- c) To create instances of classes
- d) To manage multithreading in a Java application

Question 7: Which Java framework is commonly used for building web applications and follows the Model-View-Controller (MVC) architectural pattern?

- a) Spring Framework
- b) Hibernate
- c) JavaFX
- d) Swing

Question 8: What is the purpose of the try-with-resources statement in Java?

- a) To define custom exceptions
- b) To handle exceptions in a try-catch block
- c) To automatically close resources, such as files and sockets, when they are no longer needed
- d) To create custom data structures

Question 9: Which Java framework is commonly used for building web applications and follows the Model-View-Controller (MVC) architecture?

- a) JavaFX
- b) Java Servlets
- c) Spring Framework
- d) Java Swing

Question 10: Which Java library is commonly used for sending and receiving email messages?

- a) javax.mail
- b) java.net
- c) javax.net
- d) java.mail

Question 1: What is the purpose of the java.util.stream package in Java?

- a) To work with input/output streams
- b) To create graphical user interfaces
- c) To perform operations on sequences of elements, such as filtering, mapping, and reducing
- d) To manage database connections

Question 2: What is the purpose of the transient keyword in Java?

- a) To make a variable constant
- b) To indicate that a variable should not be serialized
- c) To declare an abstract class
- d) To create a new thread

Question 3: What is the primary use of the Java Persistence API (JPA)?

- a) Creating graphical user interfaces (GUIs)
- b) Managing database persistence and mapping Java objects to database tables
- c) Implementing multithreading in Java applications
- d) Networking and socket programming

Question 4: In Java, what is the purpose of the throws keyword in a method declaration?

- a) To define a new exception class
- b) To specify the return type of the method
- c) To declare that the method may throw one or more exceptions
- d) To create a custom annotation

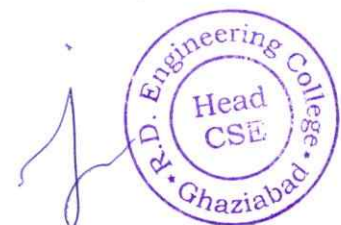

Question 5: What is the purpose of the @Override annotation in Java?

- a) To override a superclass constructor
- b) To indicate that a method is abstract
- c) To indicate that a method is implementing an interface method
- d) To indicate that a method is intended to override a superclass method

Question 6: What is the purpose of the ClassLoader in Java?

Question 1: What is the AWS service that provides scalable computing capacity in the cloud?

- a) AWS S3
- b) AWS Lambda
- c) AWS EC2
- d) AWS RDS

Question 2: Which AWS service is used for automatic scaling of applications based on traffic?

- a) AWS CloudWatch
- b) AWS Elastic Beanstalk
- c) AWS Lambda
- d) AWS RDS

Question 3: Which AWS service is designed for managing relational databases in the cloud?

- a) AWS S3
- b) AWS Lambda
- c) AWS EC2
- d) AWS RDS

Question 4: What AWS service provides a way to securely store and manage access keys, secrets, and certificates used by other AWS services?

- a) AWS IAM (Identity and Access Management)
- b) AWS S3
- c) AWS Lambda
- d) AWS EC2

Question 5: Which AWS service is used to manage and automate infrastructure deployment using code?

- a) AWS CloudFormation
- b) AWS Elastic Beanstalk
- c) AWS Lambda
- d) AWS RDS

Question 6: What AWS service provides a global content delivery network (CDN) to distribute content to users with low latency?

- a) AWS S3

  
Director

- b) AWS CloudFront
- c) AWS Lambda
- d) AWS EC2

Question 7: Which AWS service allows you to run code without provisioning or managing servers?

- a) AWS S3
- b) AWS Lambda
- c) AWS EC2
- d) AWS RDS

Question 8: What AWS service provides a fully managed, highly scalable data warehousing solution?

- a) AWS Redshift
- b) AWS Aurora
- c) AWS DynamoDB
- d) AWS Glue

Question 9: Which AWS service is designed for real-time streaming of data and processing of streaming data?

- a) AWS Kinesis
- b) AWS Lambda
- c) AWS S3
- d) AWS RDS

Question 10: What AWS service provides a serverless computing platform that runs code in response to events and automatically scales?

- a) AWS S3
- b) AWS Lambda
- c) AWS EC2
- d) AWS Elastic Beanstalk

- d) AWS RDS

Question 3: Which AWS service is designed for managing relational databases in the cloud?

- a) AWS S3
- b) AWS Lambda
- c) AWS EC2
- d) AWS RDS

Question 4: What AWS service provides a way to securely store and manage access keys, secrets, and certificates used by other AWS services?

- a) AWS IAM (Identity and Access Management)
- b) AWS S3
- c) AWS Lambda
- d) AWS EC2

Question 5: Which AWS service is used to manage and automate infrastructure deployment using code?

- a) AWS CloudFormation
- b) AWS Elastic Beanstalk
- c) AWS Lambda
- d) AWS RDS

Question 6: What AWS service provides a global content delivery network (CDN) to distribute content to users with low latency?

- a) AWS S3

- b) AWS CloudFront
- c) AWS Lambda
- d) AWS EC2

Question 7: Which AWS service allows you to run code without provisioning or managing servers?

- a) AWS S3
- b) AWS Lambda
- c) AWS EC2
- d) AWS RDS

Question 8: What AWS service provides a fully managed, highly scalable data warehousing solution?

- a) AWS Redshift
- b) AWS Aurora
- c) AWS DynamoDB
- d) AWS Glue

Question 9: Which AWS service is designed for real-time streaming of data and processing of streaming data?

- a) AWS Kinesis
- b) AWS Lambda
- c) AWS S3
- d) AWS RDS

Question 10: What AWS service provides a serverless computing platform that runs code in response to events and automatically scales?

- a) AWS S3
- b) AWS Lambda
- c) AWS EC2
- d) AWS Elastic Beanstalk

Question 1: What is AWS?

- a) An online shopping platform
- b) A cloud computing platform provided by Amazon
- c) An email service
- d) A social media network

Question 2: Which AWS service is used for scalable, high-performance compute capacity in the cloud?

- a) Amazon RDS
- b) Amazon S3
- c) Amazon EC2
- d) Amazon Lambda

Question 3: What is the AWS service used for storing and retrieving data objects like images and files?

- a) Amazon EC2
- b) Amazon SNS
- c) Amazon S3
- d) Amazon RDS

Question 4: Which AWS service allows you to create and manage a virtual private cloud (VPC)?

- a) Amazon RDS
- b) Amazon EC2
- c) Amazon VPC
- d) Amazon Lambda

Question 5: What is AWS Lambda used for?

- a) Virtual private networking
- b) Serverless computing and running code in response to events
- c) Managing databases
- d) Email communication

Question 6: Which AWS service is used for managing and scaling containerized applications using Docker?

  
Director  
R.D. Engineering College  
Duhai, Ghaziabad

- a) Amazon EC2
- b) Amazon RDS
- c) Amazon EKS (Elastic Kubernetes Service)
- d) Amazon S3

Question 7: What is the AWS service used for relational database management in the cloud?

- a) Amazon EC2
- b) Amazon SNS
- c) Amazon RDS
- d) Amazon Lambda

Question 8: What does AWS IAM stand for?

- a) Amazon Internet Management
- b) Amazon Infrastructure Management
- c) Amazon Identity and Access Management
- d) Amazon Information and Authorization Management

Question 9: Which AWS service is used for content delivery and speeding up the delivery of static and dynamic web content?

- a) Amazon EC2
- b) Amazon RDS
- c) Amazon S3
- d) Amazon CloudFront

Question 10: What is AWS Elastic Beanstalk used for?

- a) Managing and deploying applications in a scalable manner
- b) Running serverless functions
- c) Managing DNS records
- d) Analyzing large datasets

- d) Amazon Information and Authorization Management

Question 9: Which AWS service is used for content delivery and speeding up the delivery of static and dynamic web content?

- a) Amazon EC2
- b) Amazon RDS
- c) Amazon S3
- d) Amazon CloudFront

Question 10: What is AWS Elastic Beanstalk used for?

- a) Managing and deploying applications in a scalable manner
- b) Running serverless functions
- c) Managing DNS records
- d) Analyzing large datasets

Question 1: What is AWS?

- a) An online shopping platform
- b) A cloud computing platform provided by Amazon
- c) An email service
- d) A social media network

Question 2: Which AWS service is used for scalable, high-performance compute capacity in the cloud?

- a) Amazon RDS
- b) Amazon S3
- c) Amazon EC2
- d) Amazon Lambda

Question 3: What is the AWS service used for storing and retrieving data objects like images and files?

- a) Amazon EC2
- b) Amazon SNS
- c) Amazon S3
- d) Amazon RDS

Question 4: Which AWS service allows you to create and manage a virtual private cloud (VPC)?

- a) Amazon RDS
- b) Amazon EC2
- c) Amazon VPC
- d) Amazon Lambda

Question 5: What is AWS Lambda used for?

- a) Virtual private networking
- b) Serverless computing and running code in response to events
- c) Managing databases
- d) Email communication

Question 6: Which AWS service is used for managing and scaling containerized applications using Docker?

  
Director  
R.D. Engineering College  
Duhai, Ghaziabad

- a) Amazon EC2
- b) Amazon RDS
- c) Amazon EKS (Elastic Kubernetes Service)
- d) Amazon S3

Question 7: What is the AWS service used for relational database management in the cloud?

- a) Amazon EC2
- b) Amazon SNS
- c) Amazon RDS
- d) Amazon Lambda

Question 8: What does AWS IAM stand for?

- a) Amazon Internet Management
- b) Amazon Infrastructure Management
- c) Amazon Identity and Access Management
- d) Amazon Information and Authorization Management

Question 9: Which AWS service is used for content delivery and speeding up the delivery of static and dynamic web content?

- a) Amazon EC2
- b) Amazon RDS
- c) Amazon S3
- d) Amazon CloudFront

Question 10: What is AWS Elastic Beanstalk used for?

- a) Managing and deploying applications in a scalable manner
- b) Running serverless functions
- c) Managing DNS records
- d) Analyzing large datasets

**ASSESSMENT ON AWS**  
**SESSION 2022-23 ODD SEM**

Question 1: What is the purpose of AWS Elastic Beanstalk?

- a) To create and manage virtual private clouds (VPCs)
- b) To monitor and analyze AWS resource usage
- c) To easily deploy and manage web applications and services
- d) To configure virtual machines for high-performance computing

Question 2: Which AWS service provides a serverless data integration platform to move data between different data stores?

- a) AWS Data Pipeline
- b) AWS App Runner
- c) AWS Glue
- d) AWS Data Migration Service

Question 3: What does Amazon ECS Anywhere allow you to do?

- a) Run containers in any AWS region.
- b) Deploy containers on-premises or in any other cloud provider.
- c) Create virtual private clouds (VPCs) on-demand.
- d) Manage AWS Lambda functions.

Question 4: What AWS service enables you to analyze and visualize log data from your applications and systems?

- a) Amazon CloudWatch
- b) AWS CloudTrail
- c) Amazon Kinesis
- d) AWS X-Ray

Question 5: Which AWS service provides a fully managed, scalable, and serverless data warehouse?

- a) Amazon RDS
- b) Amazon Redshift
- c) Amazon DynamoDB
- d) AWS Glue

Question 6: What is the purpose of AWS Lambda Layers?

- a) To store backups of Lambda functions
- b) To manage authentication and authorization

  
Director  
R.D. Engineering College  
Duhai, Ghaziabad

- c) To share libraries and custom runtimes across multiple Lambda functions
- d) To create virtual private clouds (VPCs)

Question 7: Which AWS service provides a scalable and fully managed data streaming platform for real-time analytics?

- a) Amazon SQS
- b) Amazon S3
- c) Amazon Kinesis
- d) AWS Glue

Question 8: What AWS service allows you to automate the deployment, scaling, and management of containerized applications?

- a) Amazon EKS (Elastic Kubernetes Service)
- b) Amazon ECS (Elastic Container Service)
- c) Amazon Elastic Beanstalk
- d) AWS Fargate

Question 9: What is the purpose of AWS Secrets Manager?

- a) To manage and rotate AWS access keys
- b) To securely store and rotate sensitive information such as database passwords and API keys
- c) To monitor AWS resource usage
- d) To create virtual private clouds (VPCs)

Question 10: What AWS service provides managed message queues for decoupling application components and microservices?

- a) AWS Lambda
- b) Amazon SNS
- c) Amazon SQS (Simple Queue Service)
- d) AWS Step Functions

  
Director

**Question 1:** Which of the following is an edge-storage or content delivery system that caches data in different physical locations?

- a) Amazon CloudFront
- b) Amazon SimpleDB
- c) Amazon Associate Web Services
- d) Amazon Relational Database Service

**Question 2:** How can you view the distribution of AWS spending in one of your AWS accounts?

- a) By contacting the AWS Support team
- b) By using Amazon VPC console
- c) By contacting the AWS Finance team
- d) By using AWS Cost Explorer

**Question 3:** Which of the following is a message queue or transaction system for distributed Internet-based applications?

- a) Amazon Elastic Compute Cloud
- b) Amazon Simple Storage System
- c) Amazon Simple Queue Service
- d) Amazon Simple Notification Service

**Question 4:** What is the AWS service that provides a virtual network dedicated to your AWS account?

- a) AWS Dedicated Hosts
- b) AWS VPN
- c) AWS Subnets
- d) Amazon VPC

**Question 5:** Under the shared responsibility model, which of the following is the responsibility of AWS?

- a) Client-side encryption
- b) Configuring infrastructure devices
- c) Server-side encryption

  
Director  
R.D. Engineering College  
Dunai, Ghaziabad

d) Filtering traffic with Security Groups ✓

Question 6: What does Amazon CloudFront use to distribute content to global users with low latency?

- a) AWS Global Accelerator
- b) AWS Edge Locations ✓
- c) AWS Availability Zones
- d) AWS Regions

Question 7: Which service is used to ensure that messages between software components are not lost if one or more components fail?

- a) Amazon SES
- b) Amazon Connect
- c) Amazon SQS ✓
- d) AWS Direct Connect

Question 8: Which of the following helps a customer view the Amazon EC2 billing activity for the past month?

- a) AWS Pricing Calculator
- b) AWS Budgets
- c) AWS Cost & Usage Reports
- d) AWS Systems Manager ✗

Question 9: Amazon Web Services falls into which of the following cloud-computing category?

- a) Software as a Service
- b) Back-end as a Service
- c) Platform as a Service
- d) Infrastructure as a Service ✓

Question 10: Amazon Web Services supports which Type II Audits ?

- a) SAS20
- b) SAS70
- c) SAS702 ✓
- d) None of the Above

**Question 1:** You have set up consolidated billing for several AWS accounts. One of the accounts has purchased a number of reserved instances for 3 years. Which of the following is true regarding this scenario?

- a) All accounts can receive the hourly cost benefit of the Reserved Instances
- b) The purchased instances will have better performance than On-demand instances
- c) There are no cost benefits from using consolidated billing; It is for informational purposes only
- d) The Reserved Instance discounts can only be shared with the master account

**Question 2:** How can you view the distribution of AWS spending in one of your AWS accounts?

- a) By contacting the AWS Support team
- b) By using Amazon VPC console
- c) By contacting the AWS Finance team
- d) By using AWS Cost Explorer

**Question 3:** A Japanese company hosts their applications on Amazon EC2 instances in the Tokyo Region. The company has opened new branches in the United States, and the US users are complaining of high latency. What can the company do to reduce latency for the users in the US while minimizing costs?

- a) Applying the Amazon Connect latency-based routing policy
- b) Building a new data center in the US and implementing a hybrid model
- c) Registering a new US domain name to serve the users in the US
- d) Deploying new Amazon EC2 instances in a Region located in the US

**Question 4:** Which S3 storage class is best for data with unpredictable access patterns?

- a) Amazon S3 Standard
- b) Amazon S3 Standard-Infrequent Access
- c) Amazon S3 Glacier
- d) Amazon S3 Intelligent-Tiering

**Question 5:** Under the shared responsibility model, which of the following is the responsibility of AWS?

  
Director  
R.D. Engineering College  
Duhai, Ghaziabad

- a) Client-side encryption
- b) Configuring infrastructure devices
- c) Server-side encryption
- d) Filtering traffic with Security Groups

Question 6: Which service is used to ensure that messages between software components are not lost if one or more components fail?

- a) Amazon SES
- b) Amazon Connect
- c) Amazon SQS
- d) AWS Direct Connect

Question 7: What does Amazon CloudFront use to distribute content to global users with low latency?

- a) AWS Global Accelerator
- b) AWS Edge Locations
- c) AWS Availability Zones
- d) AWS Regions

Question 8: Which of the following helps a customer view the Amazon EC2 billing activity for the past month?

- a) AWS Pricing Calculator
- b) AWS Budgets
- c) AWS Cost & Usage Reports
- d) AWS Systems Manager

Question 9: What is the AWS service that provides a virtual network dedicated to your AWS account?

- a) AWS Dedicated Hosts
- b) AWS VPN
- c) AWS Subnets
- d) Amazon VPC

Question 10: AWS allows users to manage their resources using a web based user interface. What is the name of this interface?

- a) AWS SDK
- b) AWS API
- c) AWS Management Console
- d) AWS CLI Dedicated instances

**Question 1:** You have set up consolidated billing for several AWS accounts. One of the accounts has purchased a number of reserved instances for 3 years. Which of the following is true regarding this scenario?

- a) All accounts can receive the hourly cost benefit of the Reserved Instances
- b) The purchased instances will have better performance than On-demand instances
- c) There are no cost benefits from using consolidated billing; It is for informational purposes only
- d) The Reserved Instance discounts can only be shared with the master account

**Question 2:** How can you view the distribution of AWS spending in one of your AWS accounts?

- a) By contacting the AWS Support team
- b) By using Amazon VPC console
- c) By contacting the AWS Finance team
- d) By using AWS Cost Explorer

**Question 3:** A Japanese company hosts their applications on Amazon EC2 instances in the Tokyo Region. The company has opened new branches in the United States, and the US users are complaining of high latency. What can the company do to reduce latency for the users in the US while minimizing costs?

- a) Applying the Amazon Connect latency-based routing policy
- b) Building a new data center in the US and implementing a hybrid model
- c) Registering a new US domain name to serve the users in the US
- d) Deploying new Amazon EC2 instances in a Region located in the US

**Question 4:** Which S3 storage class is best for data with unpredictable access patterns?

- a) Amazon S3 Standard
- b) Amazon S3 Standard-Infrequent Access
- c) Amazon S3 Glacier
- d) Amazon S3 Intelligent-Tiering

**Question 5:** Under the shared responsibility model, which of the following is the responsibility of AWS?

*S Sharma*  
Director  
R.D. Engineering College  
Duhai, Ghaziabad

- a) Client-side encryption
- b) Configuring infrastructure devices
- c) Server-side encryption
- d) Filtering traffic with Security Groups

Question 6: Which service is used to ensure that messages between software components are not lost if one or more components fail?

- a) Amazon SES
- b) Amazon Connect
- c) Amazon SQS
- d) AWS Direct Connect

Question 7: What does Amazon CloudFront use to distribute content to global users with low latency?

- a) AWS Global Accelerator
- b) AWS Edge Locations
- c) AWS Availability Zones
- d) AWS Regions

Question 8: Which of the following helps a customer view the Amazon EC2 billing activity for the past month?

- a) AWS Pricing Calculator
- b) AWS Budgets
- c) AWS Cost & Usage Reports
- d) AWS Systems Manager

Question 9: What is the AWS service that provides a virtual network dedicated to your AWS account?

- a) AWS Dedicated Hosts
- b) AWS VPN
- c) AWS Subnets
- d) Amazon VPC

Question 10: AWS allows users to manage their resources using a web based user interface. What is the name of this interface?

- a) AWS SDK
- b) AWS API
- c) AWS Management Console
- d) AWS CLI Dedicated instances

**ASSESSMENT ON ADVANCED PYTHON**  
**SESSION 2022-23 ODD SEM**

Question 1: What is a closure in Python?

- a) A function that has access to variables from its containing function's scope, even after the containing function has finished executing.
- b) A function with no parameters.
- c) A function defined inside another function.
- d) A built-in Python function for closing files.

Question 2: In Python, what is the purpose of the `__init__` method in a class?

- a) To create a new instance of the class.
- b) To define the class's constructor.
- c) To access the instance variables.
- d) To define a class method.

Question 3: What does the `*args` syntax in a function definition indicate in Python?

- a) It defines keyword arguments.
- b) It is used to access the arguments passed to the function.
- c) It allows for a variable number of positional arguments.
- d) It is not a valid syntax in Python.

Question 4: In Python, what is a metaclass?

- a) A class that inherits from multiple parent classes.
- b) A class that can only be instantiated once.
- c) A class that defines the behavior of other classes.
- d) A class that cannot be inherited.

Question 5: What does the `global` keyword do in Python?

- a) It defines a global variable.
- b) It imports a module.
- c) It specifies a variable as constant.
- d) It defines a class-level variable.

Question 6: Which module in Python is used for regular expressions?

- a) `re`
- b) `regex`
- c) `regular`
- d) `regexp`

  
Director  
R.D. Engineering College  
Duhai, Ghaziabad

Question 7: What does the zip() function in Python do?

- a) Compresses files and folders.
- b) Combines two or more iterables element-wise into tuples.
- c) Converts a string to lowercase.
- d) Extracts files from a zip archive.

Question 8: What is the purpose of the itertools module in Python?

- a) To create graphical user interfaces.
- b) To perform mathematical calculations.
- c) To work with iterators and generators efficiently.
- d) To interact with databases.

Question 9: In Python, which decorator is used to turn a regular function into a generator function?

- a) @generator
- b) @iterable
- c) @coroutine
- d) @yield

Question 10: What is monkey patching in Python?

- a) A technique to add or modify methods and attributes of existing classes at runtime.
- b) A method for dealing with errors in exception handling.
- c) A way to concatenate strings.
- d) A feature for adding custom decorators to functions.

Question 1: What is a closure in Python?

- a) A function that has access to variables from its containing function's scope, even after the containing function has finished executing.
- b) A function with no parameters.
- c) A function defined inside another function.
- d) A built-in Python function for closing files.

Question 2: In Python, what is the purpose of the `__init__` method in a class?

- a) To create a new instance of the class.
- b) To define the class's constructor.
- c) To access the instance variables.
- d) To define a class method.

Question 3: What does the `*args` syntax in a function definition indicate in Python?

- a) It defines keyword arguments.
- b) It is used to access the arguments passed to the function.
- c) It allows for a variable number of positional arguments.
- d) It is not a valid syntax in Python.

Question 4: In Python, what is a metaclass?

- a) A class that inherits from multiple parent classes.
- b) A class that can only be instantiated once.
- c) A class that defines the behavior of other classes.
- d) A class that cannot be inherited.

Question 5: What does the `global` keyword do in Python?

- a) It defines a global variable.
- b) It imports a module.
- c) It specifies a variable as constant.
- d) It defines a class-level variable.

Question 6: Which module in Python is used for regular expressions?

- a) `re`
- b) `regex`
- c) `regular`
- d) `regexp`

  
Director  
R.D. Engineering College  
Duhai, Ghaziabad

Question 7: What does the zip() function in Python do?

- a) Compresses files and folders.
- b) Combines two or more iterables element-wise into tuples.
- c) Converts a string to lowercase.
- d) Extracts files from a zip archive.

Question 8: What is the purpose of the itertools module in Python?

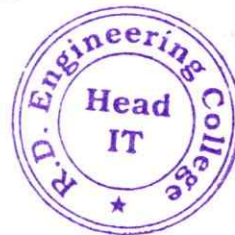

- a) To create graphical user interfaces.
- b) To perform mathematical calculations.
- c) To work with iterators and generators efficiently.
- d) To interact with databases.

Question 9: In Python, which decorator is used to turn a regular function into a generator function?

- a) @generator
- b) @iterable
- c) @coroutine
- d) @yield

Question 10: What is monkey patching in Python?

- a) A technique to add or modify methods and attributes of existing classes at runtime.
- b) A method for dealing with errors in exception handling.
- c) A way to concatenate strings.
- d) A feature for adding custom decorators to functions.

**SESSION 2022-23 ODD SEM**

Q 1:- Which of the following is not a valid access modifier in Java?

- a) public
- b) protected
- c) private
- d) package-private (default)

Q2:- In Java, what is the purpose of the transient keyword?

- a) It indicates that a variable should not be serialized.
- b) It specifies that a variable is immutable.
- c) It denotes that a method cannot be overridden.
- d) It marks a variable as volatile.

Q3:- Which design pattern is used for implementing a one-to-many relationship between objects?

- a) Singleton
- b) Observer
- c) Adapter
- d) Factory

Q4:- What is the purpose of the finalize method in Java?

- a) It is used to explicitly release system resources.
- b) It is called by the garbage collector before reclaiming an object.
- c) It is used to finalize the inheritance hierarchy.
- d) It is used to create a final instance of a class.

Q5:- In Java, which keyword is used to explicitly call the constructor of the superclass?

- a) super
- b) this
- c) extends
- d) parent

*[Signature]*  
Director  
R.D. Engineering College  
Ghaziabad, Ghaziabad

Q6. Which data structure is used to implement a Last-In-First-Out (LIFO) behavior in Java?

- a) Queue
- b) Stack
- c) List
- d) Array

Q7:- What is the purpose of the volatile keyword in Java?

- a) It makes a variable constant and cannot be changed.
- b) It ensures that a variable is not accessed by multiple threads simultaneously.
- c) It makes a variable eligible for garbage collection.
- d) It specifies the visibility of a class in a package.

Q8:- Which of the following exceptions is a checked exception in Java?

- a) NullPointerException
- b) ArrayIndexOutOfBoundsException
- c) IOException
- d) ArithmeticException

Q9:- What is the primary use of the Comparator interface in Java?

- a) To define a custom sorting order for objects.
- b) To serialize objects.
- c) To create immutable classes.
- d) To handle exceptions in multithreaded programs.

Q10:- Which Java annotation is used to mark a method that should be executed before the Spring application context is fully initialized?

- a) @Autowired
- b) @PostConstruct
- c) @PreDestroy
- d) @Bean

## ANSWER SHEET

SESSION: 22-23

ADD ON COURSE: Advanced java

Branch: IT

Semester: 5

1) Name: VIKRANT Singh

2) Roll No: 2102310139004

Select and tick only one most appropriate answer from the given options.

Two selected answers will be marked as wrong.

Questions	Answer's			
Q1.	<input checked="" type="checkbox"/> A	<input type="checkbox"/> B	<input type="checkbox"/> C	<input type="checkbox"/> D
Q2.	<input checked="" type="checkbox"/> A	<input type="checkbox"/> B	<input type="checkbox"/> C	<input type="checkbox"/> D
Q3.	<input type="checkbox"/> A	<input checked="" type="checkbox"/> B	<input type="checkbox"/> C	<input type="checkbox"/> D
Q4.	<input type="checkbox"/> A	<input checked="" type="checkbox"/> B	<input type="checkbox"/> C	<input type="checkbox"/> D
Q5.	<input checked="" type="checkbox"/> A	<input type="checkbox"/> B	<input type="checkbox"/> C	<input type="checkbox"/> D
Q6.	<input type="checkbox"/> A	<input checked="" type="checkbox"/> B	<input type="checkbox"/> C	<input type="checkbox"/> D
Q7.	<input type="checkbox"/> A	<input checked="" type="checkbox"/> B	<input type="checkbox"/> C	<input type="checkbox"/> D
Q8.	<input type="checkbox"/> A	<input type="checkbox"/> B	<input checked="" type="checkbox"/> C	<input type="checkbox"/> D
Q9.	<input checked="" type="checkbox"/> A	<input type="checkbox"/> B	<input type="checkbox"/> C	<input type="checkbox"/> D
Q10.	<input type="checkbox"/> A	<input checked="" type="checkbox"/> B	<input type="checkbox"/> C	<input type="checkbox"/> D
